

CLAIMS

I claim:

1. A portable barbecue pit comprising:

a grill grate having a top, a bottom, a front, a rear, and opposing sides;

5 a lid having a front, a back, a top, and a bottom with said bottom frictionally engaged with said top of said grill grate;

a plurality of handles attached to said front and said back of said lid;

a rear wall having a top frictionally engaged with said back of said bottom of said grill grate;

10 a plurality of sidewalls having a top and opposing sides with said top frictionally engaged with said opposing sides of said bottom of said grill grate; and

a plurality of doors having opposing sides and a bottom with one of said sides hingedly connected by door hinges to one of said sides of said sidewalls.

15 2. The portable barbecue pit as defined in Claim 1, further comprising a plurality of grill latches removably connecting said opposing sides of said grill grate to said top of said sidewalls.

3. The portable barbecue pit as defined in Claim 2, wherein said grill latches are hasps.

4. The portable barbecue pit as defined in Claim 1, further comprising a plurality of door flaps hingedly attached by door flap hinges to said bottom of said doors.

20 5. The portable barbecue pit as defined in Claim 1, further comprising a lid support having opposing ends with one end frictionally engaged with said bottom of said lid and said opposing end frictionally engaged with said top of said grill grate.

6. The portable barbecue pit as defined in Claim 1, wherein said portable barbecue pit is selected from the group consisting of steel, aluminum, and titanium.

25 7. The portable barbecue pit as defined in Claim 1, wherein said lid, said rear wall, and said sidewalls are of tubular frame construction with attached sheets.

8. The portable barbecue pit as defined in Claim 1, wherein said portable barbecue pit is about 50 in. high, 74 in. long, and 47 ½ in. wide.

30 9. The portable barbecue pit as defined in Claim 1, wherein said rear wall, said sidewalls, said doors, and said grill grate can be stacked atop said lid to allow the portable barbecue pit to be

transported using said handles.

10. A portable barbecue pit comprising:

a rear wall having opposing sides and a top;

a plurality of sidewalls having opposing sides and a top with one of said sides attached
5 to one of said sides of said rear wall;

a plurality of doors having opposing sides and a bottom with one of said opposing
sides hingedly attached by door hinges to said opposing side of said sidewalls;

a grill grate having a front, a back, a top, a bottom, and opposing sides with said back
of said bottom frictionally engaged with said top of said rear wall and said opposing
10 sides of said bottom frictionally engaged with said top of said sidewalls;

a lid having a front, a back, a top, and a bottom with said bottom frictionally engaged
with said top of said grill grate; and

a plurality of handles attached to said front and said back of said bottom of said lid.

11. The portable barbecue pit as defined in Claim 10, further comprising a plurality of hasps
15 removably connecting said opposing sides of said grill grate to said top of said sidewalls.

12. The portable barbecue pit as defined in Claim 10, further comprising a plurality of door
flaps hingedly attached by door flap hinges to said bottom of said doors.

13. The portable barbecue pit as defined in Claim 10, further comprising a lid support having
opposing ends with one end frictionally engaged with said bottom of said lid and said opposing
20 end frictionally engaged with said top of said grill grate.

14. The portable barbecue pit as defined in Claim 10, wherein said lid, said rear wall, and said
sidewalls are of tubular frame construction with attached sheets.

15. The portable barbecue pit as defined in Claim 14, wherein said portable barbecue pit is
selected from the group consisting of steel, aluminum, and titanium.

25 16. A portable barbecue pit comprising:

a lid having a front, a back, a top, and a bottom;

a grill grate having a top, a bottom, a front, a rear, and opposing sides with said top
frictionally engaged with said bottom of said lid;

a plurality of handles attached to said front and said back of said lid;

30 a rear wall having a top frictionally engaged with said back of said bottom of said grill

grate;

a plurality of sidewalls having a top and opposing sides with said top frictionally engaged with said opposing sides of said bottom of said grill grate;

a plurality of hasps removably connecting said opposing sides of said grill grate to said top of said sidewalls; and

a plurality of doors having opposing sides and a bottom with one of said sides hingedly connected to one of said sides of said sidewalls.

17. The portable barbecue pit as defined in Claim 16, wherein said rear wall, said sidewalls, said doors, and said grill grate can be stacked atop said lid to allow the portable barbecue pit to be transported using said handles.

18. The portable barbecue pit as defined in Claim 17, further comprising a plurality of door flaps hingedly attached to said bottom of said doors.

19. The portable barbecue pit as defined in Claim 18, further comprising a lid support having opposing ends with one end frictionally engaged with said bottom of said lid and said opposing end frictionally engaged with said top of said grill grate.

20. The portable barbecue pit as defined in Claim 19, wherein said lid, said rear wall, and said sidewalls are of tubular frame construction with attached sheets.
